

Pharma Agentic AI – Analysis Report

Query: Full opportunity assessment for MOLX in Asthma in India.

Generated on: 07 Dec 2025, 03:05 PM

Report ID: 072b08ca-4cfe-45ea-a952-7661af1798bc

Executive Summary

Total market size: 5737.1 Mn USD with average 5Y CAGR 7.8%. Records: 14. | Total imports: 9366.1 tonnes, total exports: 10446.6 tonnes across 201 records. | Found 1 relevant patents. Earliest expiry year: 2031. | Found 27 clinical trials matching the criteria. | MOLX Opportunity Assessment in Asthma India: Identifies potential opportunities for MOLX in addressing unmet needs, including steroid-free options, safer formulations for the elderly, and affordable once-daily inhalers. However, key risks include operational constraints in tier-2/3 cities and evidence gaps in pediatric asthma treatment. | The latest GINA 2024 guideline emphasizes minimizing oral corticosteroid exposure in favor of ICS-based inhalers, while real-world evidence reveals low adherence and incorrect use of inhalers in low-resource settings, highlighting the need for improved access and education.

IQVIA Insights Agent

Summary: Total market size: 5737.1 Mn USD with average 5Y CAGR 7.8%. Records: 14.

Details:

Table:

- molecule:** MOLX **indication:** Asthma **country:** India **year:** 2024 **sales_usd_mn:** 599.97 **cagr_5y:** 12.16 **competitors:** 1 **patient_burden_index:** 0.89
- molecule:** MOLX **indication:** Asthma **country:** India **year:** 2020 **sales_usd_mn:** 132.99 **cagr_5y:** 3.47 **competitors:** 3 **patient_burden_index:** 0.91

- **molecule:** MOLX **indication:** Asthma **country:** India **year:** 2020 **sales_usd_mn:** 544.31 **cagr_5y:** 12.73 **competitors:** 2 **patient_burden_index:** 0.69
- **molecule:** MOLX **indication:** Asthma **country:** India **year:** 2019 **sales_usd_mn:** 270.06 **cagr_5y:** 10.4 **competitors:** 3 **patient_burden_index:** 0.56
- **molecule:** MOLX **indication:** Asthma **country:** India **year:** 2020 **sales_usd_mn:** 471.22 **cagr_5y:** 7.99 **competitors:** 12 **patient_burden_index:** 0.46

EXIM Trade Agent

Summary: Total imports: 9366.1 tonnes, total exports: 10446.6 tonnes across 201 records.

Details:

Table:

- **molecule:** MOLX **formulation:** Tablet **country:** India **year:** 2023 **import_tonnes:** 35.34 **export_tonnes:** 61.55
- **molecule:** MOLX **formulation:** Inhaler **country:** India **year:** 2022 **import_tonnes:** 48.57 **export_tonnes:** 99.52
- **molecule:** MOLX **formulation:** Inhaler **country:** India **year:** 2020 **import_tonnes:** 41.7 **export_tonnes:** 6.74
- **molecule:** MOLX **formulation:** Capsule **country:** India **year:** 2023 **import_tonnes:** 24.61 **export_tonnes:** 16.85

- **molecule:** MOLX **formulation:** Capsule **country:** India **year:** 2021 **import_tonnes:** 54.67 **export_tonnes:** 37.21

- ... (5 more records)

Patent Landscape Agent

Summary: Found 1 relevant patents. Earliest expiry year: 2031.

Details:

Patents:

- **patent_id:** US1234567 **molecule:** MOLX **indication:** Asthma **assignee:** BigPharma Inc **filing_year:** 2016 **expiry_year:** 2031 **status:** Granted **fto_flag:** Medium

Clinical Trials Agent

Summary: Found 27 clinical trials matching the criteria.

Details:

Table:

- **trial_id:** CT-00509 **molecule:** MOLX **indication:** Asthma **phase:** Phase III **status:** Recruiting **sponsor:** PrimeCare **country:** India

- **trial_id:** CT-00775 **molecule:** MOLX **indication:** Asthma **phase:** Phase I **status:** Recruiting **sponsor:** NeoHealth **country:** India

- **trial_id:** CT-00892 **molecule:** MOLX **indication:** Asthma **phase:** Phase II **status:** Terminated **sponsor:** NovaCure **country:** India

- **trial_id:** CT-01250 **molecule:** MOLX **indication:** Asthma **phase:** Phase I **status:** Suspended **sponsor:** NeoHealth **country:** India

- **trial_id:** CT-01365 **molecule:** MOLX **indication:** Asthma **phase:** Phase II **status:** Recruiting **sponsor:** NeoHealth **country:** India

Internal Knowledge Agent

Summary: MOLX Opportunity Assessment in Asthma India: Identifies potential opportunities for MOLX in addressing unmet needs, including steroid-free options, safer formulations for the elderly, and affordable once-daily inhalers. However, key risks include operational constraints in tier-2/3 cities and evidence gaps in pediatric asthma treatment.

Details:

Documents:

- asthma_strategy_2024.pdf

- respiratory_field_insights.pdf

Highlights:

- **doc_name:**

C:\Users\vishw\OneDrive\Desktop\Pharma\backend\app\data\internal_docs\asthma_strategy_2024.pdf

page: 0 **snippet:** Asthma Market & Unmet Needs – Internal Strategy 2024 • High burden in India with increasing prevalence. • Despite many competitors, steroid-free options limited. • Elderly population ke liye safer formulations ki demand badh rahi hai. • Fixed-dose combinations ka uptake stable hai but expensive. • Opportunity: once-daily inhaler for better adherence.

- **doc_name:**

C:\Users\vishw\OneDrive\Desktop\Pharma\backend\app\data\internal_docs\respiratory_field_insights.pdf

page: 0 **snippet:** respiratory_field_insights • Tier-2/3 cities me inhaler affordability ek major issue hai. • Steroid intolerance wale patients ke liye alternative therapies kam hain. • Many patients struggle with correct inhaler technique → low adherence. • Rural hospitals prefer cheaper DPIs over expensive MDIs. • Pediatric asthma cases me suitable low-dose options missing.

Key Opportunities:

- Steroid-free option for patients with high disease burden in India
 - Safer, once-daily inhaler with improved adherence for elderly patients
 - Affordable, low-dose inhaler options for pediatric asthma cases
 - Repurposing for Tier-2/3 city inhaler adoption through affordable DPIs
-

Key Risks:

- Operational constraints in tier-2/3 cities for affordable inhaler rollout
 - Evidence gaps in pediatric asthma treatment and low-dose inhaler efficacy
-

- Competition from established fixed-dose combinations and high prices
-
- Low adoption rate due to incorrect inhaler technique and adherence issues
-

Web Intelligence Agent

Summary: The latest GINA 2024 guideline emphasizes minimizing oral corticosteroid exposure in favor of ICS-based inhalers, while real-world evidence reveals low adherence and incorrect use of inhalers in low-resource settings, highlighting the need for improved access and education.
