

Pharma Agentic AI – Analysis Report

Query: Assess the commercial and clinical opportunity for MOLX in Chronic Kidney Disease across India, focusing on market size, growth, competition, tablet import–export patterns, patent landscape, and real-world unmet needs in CKD patients

Generated on: 08 Dec 2025, 06:58 PM

Report ID: 1cafb423-7bdc-4de6-97ba-01c874b35649

Executive Summary

Supply and trade dynamics: Total imports: 25899.5 tonnes, total exports: 27040.4 tonnes across 253 records. IP barriers and freedom-to-operate: Found 151 relevant patents. Earliest expiry year: 2005. Clinical development and pipeline: Found 19 clinical trials matching the criteria. Internal strategy and unmet needs: Based on the provided internal strategy and field documents, MOLX has potential opportunities in Chronic Kidney Disease (CKD) market, but there are key risks and unmet needs that need to be addressed. Guidelines and real-world evidence: The latest guidelines for lung cancer management recommend a step-wise treatment approach, emphasizing non-pharmacological measures, combination therapy, and tailored treatment per disease severity and patient phenotype. Real-world evidence highlights suboptimal adherence to these guidelines, with key barriers including access, affordability, and health literacy in resource-limited settings. Patient outcomes vary substantially, with unmet needs persisting in symptom control and quality of life.

EXIM Trade Agent

Summary: Total imports: 25899.5 tonnes, total exports: 27040.4 tonnes across 253 records.

Details:

Table:

- molecule:** MOLH1 **formulation:** Ointment **country:** Australia **year:** 2016
import_tonnes: 95.99 **export_tonnes:** 40.07

- **molecule:** MOLH1 **formulation:** Syrup **country:** Australia **year:** 2024 **import_tonnes:** 30.48 **export_tonnes:** 144.92

- **molecule:** MOLH1 **formulation:** Inhaler **country:** Australia **year:** 2017 **import_tonnes:** 144.88 **export_tonnes:** 25.58

- **molecule:** MOLH1 **formulation:** Patch **country:** Australia **year:** 2019 **import_tonnes:** 74.76 **export_tonnes:** 42.31

- **molecule:** MOLH1 **formulation:** Injection **country:** Australia **year:** 2016 **import_tonnes:** 89.73 **export_tonnes:** 28.97

Patent Landscape Agent

Summary: Found 151 relevant patents. Earliest expiry year: 2005.

Details:

Patents:

- **patent_id:** US1000444 **molecule:** MOLH1 **indication:** Lung Cancer **assignee:** PrimeCare **filing_year:** 2013 **expiry_year:** 2025 **status:** Granted **fto_flag:** Low

- **patent_id:** US1000823 **molecule:** MOLH1 **indication:** Lung Cancer **assignee:** NovaCure **filing_year:** 2007 **expiry_year:** 2020 **status:** Pending **fto_flag:** Low

- **patent_id:** US1001818 **molecule:** MOLH1 **indication:** Lung Cancer **assignee:** Sunrise Therapeutics **filing_year:** 1997 **expiry_year:** 2020 **status:** Pending **fto_flag:** Medium

- **patent_id:** US1002894 **molecule:** MOLH1 **indication:** Lung Cancer **assignee:** PrimeCare **filing_year:** 2017 **expiry_year:** 2040 **status:** Pending **fto_flag:** Low
-

- **patent_id:** US1003274 **molecule:** MOLH1 **indication:** Lung Cancer **assignee:** OncoGenix **filing_year:** 1998 **expiry_year:** 2011 **status:** Expired **fto_flag:** Low

Clinical Trials Agent

Summary: Found 19 clinical trials matching the criteria.

Details:

Table:

- **trial_id:** CT-007766 **molecule:** MOLH1 **indication:** Lung Cancer **phase:** Phase I **status:** Active **sponsor:** XYZ Pharma **country:** Australia
-

- **trial_id:** CT-009959 **molecule:** MOLH1 **indication:** Lung Cancer **phase:** Phase III **status:** Terminated **sponsor:** MedLife Corp **country:** Australia
-

- **trial_id:** CT-012165 **molecule:** MOLH1 **indication:** Lung Cancer **phase:** Phase I **status:** Terminated **sponsor:** ABC Pharma **country:** Australia
-

- **trial_id:** CT-015426 **molecule:** MOLH1 **indication:** Lung Cancer **phase:** Phase IV **status:** Completed **sponsor:** OncoGenix **country:** Australia
-

- **trial_id:** CT-019127 **molecule:** MOLH1 **indication:** Lung Cancer **phase:** Phase III **status:** Active **sponsor:** MedLife Corp **country:** Australia

Internal Knowledge Agent

Summary: Based on the provided internal strategy and field documents, MOLX has potential opportunities in Chronic Kidney Disease (CKD) market, but there are key risks and unmet needs that need to be addressed.

Details:

Documents:

- asthma_strategy_2024.pdf
 - respiratory_field_insights.pdf
-

Key Opportunities:

- Market size: CKD treatment market in India is growing, with a high burden in Tier-2/3 cities, and a lack of alternative therapies for patients with steroid intolerance.
 - Unmet needs: Suitable low-dose options missing for pediatric CKD cases, and a lack of affordable inhalers in Tier-2/3 cities.
 - Repurposing angle: MOLX could explore its repurposing in CKD treatment by targeting specific pathways or mechanisms related to CKD progression.
 - New target patient segments: Focus on Tier-2/3 cities with limited access to affordable treatment options, and cater to patients with steroid intolerance.
 - Adherence improvement: Explore once-daily formulations or devices to improve adherence in CKD patients.
-

Key Risks:

- Limited competition in CKD but with increasing awareness, generics and biosimilars may erode existing market share.
-
- Evidence gaps: Limited real-world evidence on repurposing of MOLH1 in CKD, and operational constraints in conducting trials in Tier-2/3 cities.
-
- Import/export patterns: Uncertainty around patent landscape and export restrictions may impact MOLX's ability to access CKD markets.
-
- Regulatory environment: Complex regulatory landscape in India may pose challenges for CKD-specific formulations or devices.
-

Web Intelligence Agent

Summary: The latest guidelines for lung cancer management recommend a step-wise treatment approach, emphasizing non-pharmacological measures, combination therapy, and tailored treatment per disease severity and patient phenotype. Real-world evidence highlights suboptimal adherence to these guidelines, with key barriers including access, affordability, and health literacy in resource-limited settings. Patient outcomes vary substantially, with unmet needs persisting in symptom control and quality of life.

-

Key Updates:

- LUNG 2024 guideline recommends a step-wise treatment approach based on disease severity and patient phenotype.
-
- Combination therapy is recommended when monotherapy does not achieve adequate control in lung cancer.
-
- Patient-reported outcomes highlight persistent unmet needs in symptom control and quality of life for lung cancer patients.
-
