

# Pharma Agentic AI – Summary Report

## Overall Summary:

No IQVIA data found for given filters. | Total imports: 55.0 tonnes, total exports: 50.0 tonnes across 2 records. | No patents found for selection. | No clinical trials found for given filters. | Respiratory diseases in India present opportunities for innovative steroid-free treatments, convenient once-daily inhalers, and targeted therapies for specific patient segments, but affordability and correct inhaler technique remain major challenges. Operational constraints, limited suitable low-dose options for pediatric asthma cases, and evidence gaps in steroid intolerance highlight key risks and areas for development. | Recent CHEST guidelines advocate for early COPD screening in smokers via spirometry, favoring combination bronchodilator therapy for moderate to severe cases. However, real-world evidence reveals underdiagnosis, particularly in rural India, driven by spirometry scarcity. Moreover, there's a continued reliance on oral steroids despite guidelines.

## IQVIA Insights Agent Findings:

No IQVIA data found for given filters.

## EXIM Trade Agent Findings:

Total imports: 55.0 tonnes, total exports: 50.0 tonnes across 2 records.

## Patent Landscape Agent Findings:

No patents found for selection.

## Clinical Trials Agent Findings:

No clinical trials found for given filters.

## Internal Knowledge Agent Findings:

Respiratory diseases in India present opportunities for innovative steroid-free treatments, convenient once-daily inhalers, and targeted therapies for specific patient segments, but affordability and correct inhaler technique remain major challenges. Operational constraints, limited suitable low-dose options for pediatric asthma cases, and evidence gaps in steroid intolerance highlight key risks and areas for development.

## Web Intelligence Agent Findings:

Recent CHEST guidelines advocate for early COPD screening in smokers via spirometry, favoring combination bronchodilator therapy for moderate to severe cases. However, real-world evidence reveals underdiagnosis, particularly in rural India, driven by spirometry scarcity. Moreover, there's a continued reliance on oral steroids despite guidelines.
