

Pharma Agentic AI – Analysis Report

Query: Assess the commercial and clinical opportunity for MOLDEP2 in Chronic Kidney Disease across Europe and Australia, focusing on market size, growth, competition, tablet import–export patterns, patent landscape, and real-world unmet needs in CKD patients.

Generated on: 08 Dec 2025, 04:52 PM

Report ID: 43eb55bd-006a-4816-87c6-66e5b00e9858

Executive Summary

Supply and trade dynamics: Total imports: 27940.6 tonnes, total exports: 27449.0 tonnes across 272 records. IP barriers and freedom-to-operate: No patents found for selection. Guidelines and real-world evidence: The Global Initiative for Asthma (GINA) guidelines recommend stepwise management of asthma, starting with bronchodilator therapy for mild asthma. For moderate and severe asthma, inhaled corticosteroids (ICS) are recommended, often with additional controllers. Real-world studies support the effectiveness of ICS-containing regimens, with a US study showing improved asthma control in adult patients. A UK study found that adherence to GINA guidelines reduced severe asthma exacerbations. Furthermore, the evidence base supports the role of biologic therapies, such as omalizumab, for severe, uncontrolled asthma.

EXIM Trade Agent

Summary: Total imports: 27940.6 tonnes, total exports: 27449.0 tonnes across 272 records.

Key Updates:

- GINA guidelines recommend stepwise asthma management starting with bronchodilator therapy for mild asthma.
-
- Real-world evidence supports the effectiveness of inhaled corticosteroids (ICS)-containing regimens in improving asthma control.
-
- Biologic therapies, such as omalizumab, play a significant role in treating severe, uncontrolled asthma.
-
