

Pharma Agentic AI – Analysis Report

Query: Perform a complete end-to-end opportunity assessment for the molecule MOLX in the Indian Asthma market, including market sizing trends, import–export dependencies, patent barriers, clinical trial landscape, internal strategic insights, and alignment with the latest GINA guidelines. Identify unmet needs, repurposing opportunities, whitespace areas, key risks, and recommended product concepts for future portfolio expansion.

Generated on: 07 Dec 2025, 07:31 PM

Report ID: 64fab3c1-8d98-4dd3-94ae-078d01a6530a

Executive Summary

Total market size: 5737.1 Mn USD with average 5Y CAGR 7.8%. Records: 14. | Total imports: 9366.1 tonnes, total exports: 10446.6 tonnes across 201 records. | Found 45 relevant patents. Earliest expiry year: 2020. | Found 27 clinical trials matching the criteria. | MOLX offers opportunities in the Indian Asthma market with a potential focus on steroid-free options, safer formulations, and more affordable treatments. | GINA 2024 emphasizes minimizing oral corticosteroids use by preferring ICS-based inhalers. Despite this, Indian RWE studies show low adherence and high inhaler costs in Tier-2/3 cities. Incorrect inhaler use contributes to poor symptom control, with rural areas increasingly relying on oral steroids.

IQVIA Insights Agent

Summary: Total market size: 5737.1 Mn USD with average 5Y CAGR 7.8%. Records: 14.

Internal Knowledge Agent

Summary: MOLX offers opportunities in the Indian Asthma market with a potential focus on steroid-free options, safer formulations, and more affordable treatments.

Details:

Documents:

- asthma_strategy_2024.pdf
 - respiratory_field_insights.pdf
-

Highlights:

- **doc_name:**

C:\Users\vishw\OneDrive\Desktop\Pharma\backend\app\data\internal_docs\asthma_strategy_2024.pdf
page: 0 **snippet:** Asthma Market & Unmet Needs – Internal Strategy 2024 • High burden in India with increasing prevalence. • Despite many competitors, steroid-free options limited. • Elderly population ke liye safer formulations ki demand badh rahi hai. • Fixed-dose combinations ka uptake stable hai but expensive. • Opportunity: once-daily inhaler for better adherence.

- **doc_name:**

C:\Users\vishw\OneDrive\Desktop\Pharma\backend\app\data\internal_docs\respiratory_field_insights.pdf
page: 0 **snippet:** respiratory_field_insights • Tier-2/3 cities me inhaler affordability ek major issue hai. • Steroid intolerance wale patients ke liye alternative therapies kam hain. • Many patients struggle with correct inhaler technique → low adherence. • Rural hospitals prefer cheaper DPIs over expensive MDIs. • Pediatric asthma cases me suitable low-dose options missing.

Key Opportunities:

- Develop a steroid-free inhaler option for improved patient safety and adherence
 - Create a safer formulation for elderly patients, addressing increased demand in this population
-

- Target Tier-2/3 cities with affordable inhalers, improving accessibility and affordability
- Design alternative therapies for steroid-intolerant patients, addressing a significant market gap
- Develop low-dose inhalers suitable for pediatric patients, addressing a lack of suitable options
- ... (3 more records)

Key Risks:

- Rural and Tier-2/3 city markets may face affordability challenges, impacting adoption and revenue
- Stiff competition from established competitors, making it difficult to gain market share
- Dependence on imports may lead to supply chain risks and regulatory barriers
- Evidence gaps in safety and efficacy of steroid-free formulations for specific patient populations
- Clinical trial landscape uncertainty and potential delays or setbacks in trial execution
- ... (2 more records)

Web Intelligence Agent

Summary: GINA 2024 emphasizes minimizing oral corticosteroids use by preferring ICS-based inhalers. Despite this, Indian RWE studies show low adherence and high inhaler costs in Tier-2/3

cities. Incorrect inhaler use contributes to poor symptom control, with rural areas increasingly relying on oral steroids.
