

Pharma Agentic AI – Analysis Report

Query: User Query

Generated on: 07 Dec 2025, 02:59 PM

Report ID: 67f3ba4c-bcd1-4164-a207-95f07e3708ee

Executive Summary

Total market size: 5737.1 Mn USD with average 5Y CAGR 7.8%. Records: 14. | Total imports: 9366.1 tonnes, total exports: 10446.6 tonnes across 201 records. | Found 1 relevant patents. Earliest expiry year: 2031. | Found 27 clinical trials matching the criteria. | Unmet needs in asthma treatment options in India highlight opportunities for MOLX to innovate, repurpose, or expand its product portfolio. | The latest GINA guidelines recommend minimizing oral corticosteroid use and preferring ICS-based inhalers. Real-world evidence suggests issues with inhaler adherence, incorrect use, and increased reliance on oral steroids in Tier-2/3 cities and rural areas.

IQVIA Insights Agent

Summary: Total market size: 5737.1 Mn USD with average 5Y CAGR 7.8%. Records: 14.

Details:

- table:** [{ 'molecule': 'MOLX', 'indication': 'Asthma', 'country': 'India', 'year': 2024, 'sales_usd_mn': 599.97, 'cagr_5y': 12.16, 'competitors': 1, 'patient_burden_index': 0.89 }, { 'molecule': 'MOLX', 'indication': 'Asthma', 'country': 'India', 'year': 2020, 'sales_usd_mn': 132.99, 'cagr_5y': 3.47, 'competitors': 3, 'patient_burden_index': 0.91 }, { 'molecule': 'MOLX', 'indication': 'Asthma', 'country': 'India', 'year': 2020, 'sales_usd_mn': 544.31, 'cagr_5y': 12.73, 'competitors': 2, 'patient_burden_index': 0.69 }, { 'molecule': 'MOLX', 'indication': 'Asthma', 'country': 'India', 'year': 2019, 'sales_usd_mn': 270.06, 'cagr_5y': 10.4, 'competitors': 3, 'patient_burden_index': 0.56 }, { 'molecule': 'MOLX', 'indication': 'Asthma', 'country': 'India', 'year': 2020, 'sales_usd_mn': 471.22, 'cagr_5y': 7.99, 'competitors': 12, 'patient_burden_index': 0.46 }, { 'molecule': 'MOLX', 'indication': 'Asthma', 'country': 'India', 'year': 2021, 'sales_usd_mn': 83.81, 'cagr_5y': 11.64, 'competitors': 12, 'patient_burden_index': 0.4 }, { 'molecule': 'MOLX', 'indication': 'Asthma', 'country': 'India', 'year': 2024, 'sales_usd_mn': 309.26, 'cagr_5y': 9.24, 'competitors': 10, 'patient_burden_index': 0.46 }]

EXIM Trade Agent

Summary: Total imports: 9366.1 tonnes, total exports: 10446.6 tonnes across 201 records.

Details:

- table:** [{'molecule': 'MOLX', 'formulation': 'Tablet', 'country': 'India', 'year': 2023, 'import_tonnes': 35.34, 'export_tonnes': 61.55}, {'molecule': 'MOLX', 'formulation': 'Inhaler', 'country': 'India', 'year': 2022, 'import_tonnes': 48.57, 'export_tonnes': 99.52}, {'molecule': 'MOLX', 'formulation': 'Inhaler', 'country': 'India', 'year': 2020, 'import_tonnes': 41.7, 'export_tonnes': 6.74}, {'molecule': 'MOLX', 'formulation': 'Capsule', 'country': 'India', 'year': 2023, 'import_tonnes': 24.61, 'export_tonnes': 16.85}, {'molecule': 'MOLX', 'formulation': 'Capsule', 'country': 'India', 'year': 2021, 'import_tonnes': 54.67, 'export_tonnes': 37.21}, {'molecule': 'MOLX', 'formulation': 'Tablet', 'country': 'India', 'year': 2024, 'import_tonnes': 49.72, 'export_tonnes': 46.84}, {'molecule': 'MOLX', 'formulation': 'Syrup', 'country': 'India', 'year': 2020, 'import_tonnes': 17.58, 'export_tonnes': 79.15}, {'molecule': 'MOLX', 'formulation': 'Ointment', 'country': 'India', 'year': 2024, 'import_tonnes': 79.81, 'export_tonnes': 73.03}, {'molecule': 'MOLX', 'formulation': 'Inhaler', 'country': 'India', 'year': 2020, 'import_tonnes': 77.98, 'export_tonnes': 92.57}, {'molecule': 'MOLX', 'formulation': 'API', 'country': 'India', 'year': 2022, 'import_tonnes': 59.8, 'export_tonnes': 66.65}]
-

Patent Landscape Agent

Summary: Found 1 relevant patents. Earliest expiry year: 2031.

Details:

- **patents:** [{'patent_id': 'US1234567', 'molecule': 'MOLX', 'indication': 'Asthma', 'assignee': 'BigPharma Inc', 'filing_year': 2016, 'expiry_year': 2031, 'status': 'Granted', 'fto_flag': 'Medium'}]

Clinical Trials Agent

Summary: Found 27 clinical trials matching the criteria.

Details:

- **table:** [{'trial_id': 'CT-00509', 'molecule': 'MOLX', 'indication': 'Asthma', 'phase': 'Phase III', 'status': 'Recruiting', 'sponsor': 'PrimeCare', 'country': 'India'}, {'trial_id': 'CT-00775', 'molecule': 'MOLX', 'indication': 'Asthma', 'phase': 'Phase I', 'status': 'Recruiting', 'sponsor': 'NeoHealth', 'country': 'India'}, {'trial_id': 'CT-00892', 'molecule': 'MOLX', 'indication': 'Asthma', 'phase': 'Phase II', 'status': 'Terminated', 'sponsor': 'NovaCure', 'country': 'India'}, {'trial_id': 'CT-01250', 'molecule': 'MOLX', 'indication': 'Asthma', 'phase': 'Phase I', 'status': 'Suspended', 'sponsor': 'NeoHealth', 'country': 'India'}, {'trial_id': 'CT-01365', 'molecule': 'MOLX', 'indication': 'Asthma', 'phase': 'Phase II', 'status': 'Recruiting', 'sponsor': 'NeoHealth', 'country': 'India'}, {'trial_id': 'CT-01415', 'molecule': 'MOLX', 'indication': 'Asthma', 'phase': 'Phase II', 'status': 'Recruiting', 'sponsor': 'XYZ Pharma', 'country': 'India'}, {'trial_id': 'CT-01957', 'molecule': 'MOLX', 'indication': 'Asthma', 'phase': 'Phase II', 'status': 'Completed', 'sponsor': 'ABC Pharma', 'country': 'India'}, {'trial_id': 'CT-02138', 'molecule': 'MOLX', 'indication': 'Asthma', 'phase': 'Phase I', 'status': 'Recruiting', 'sponsor': 'PrimeCare', 'country': 'India'}, {'trial_id': 'CT-02417', 'molecule': 'MOLX', 'indication': 'Asthma', 'phase': 'Phase II', 'status': 'Recruiting', 'sponsor': 'XYZ Pharma', 'country': 'India'}, {'trial_id': 'CT-03000', 'molecule': 'MOLX', 'indication': 'Asthma', 'phase': 'Phase I', 'status': 'Active', 'sponsor': 'Sunrise Therapeutics', 'country': 'India'}]
-

Internal Knowledge Agent

Summary: Unmet needs in asthma treatment options in India highlight opportunities for MOLX to innovate, repurpose, or expand its product portfolio.

Details:

- **documents:** ['asthma_strategy_2024.pdf', 'respiratory_field_insights.pdf']
-

- **highlights:** [{ 'doc_name': 'C:\\Users\\vishw\\OneDrive\\Desktop\\Pharma\\backend\\app\\data\\internal_docs\\asthma_strategy_2024.pdf', 'page': 0, 'snippet': 'Asthma Market & Unmet Needs – Internal Strategy 2024 • High burden in India with increasing prevalence. • Despite many competitors, steroid-free options limited. • Elderly population ke liye safer formulations ki demand badh rahi hai. • Fixed-dose combinations ka uptake stable hai but expensive. • Opportunity: once-daily inhaler for better adherence.' }, { 'doc_name': 'C:\\Users\\vishw\\OneDrive\\Desktop\\Pharma\\backend\\app\\data\\internal_docs\\respiratory_field_insights.pdf', 'page': 0, 'snippet': 'respiratory_field_insights • Tier-2/3 cities me inhaler affordability ek major issue hai. • Steroid intolerance wale patients ke liye alternative therapies kam hain. • Many patients struggle with correct inhaler technique → low adherence. • Rural hospitals prefer cheaper DPIs over expensive MDIs. • Pediatric asthma cases me suitable low-dose options missing.' }]
-

- **key_opportunities:** ['Develop a safer inhaler formulation for the elderly population, addressing safety concerns and regulatory hurdles.', 'Create a once-daily inhaler for improved adherence, filling the gap in steroid-free options.', 'Launch low-dose options for pediatric asthma patients, addressing unmet needs in this vulnerable population.', 'Develop alternative therapies for steroid-intolerant patients, leveraging MOLX's expertise in repurposing existing molecules.', 'Explore affordable inhaler options for Tier-2/3 cities, improving accessibility for millions of patients.']
-

- **key_risks:** ['Regulatory complexities and safety concerns may hinder the development of safer formulations for elderly patients.', 'Competition from established players and generic options may limit market share for innovative products.', 'Evidence gaps and operational constraints may slow the launch of pediatric and low-dose options.', 'Rural hospitals' preference for cheaper DPIs over MDIs may require MOLX to adapt its product and pricing strategy.', 'Limited understanding of asthma treatment preferences in Tier-2/3 cities may require additional market research and insights.']
-

Web Intelligence Agent

Summary: The latest GINA guidelines recommend minimizing oral corticosteroid use and preferring ICS-based inhalers. Real-world evidence suggests issues with inhaler adherence, incorrect use, and increased reliance on oral steroids in Tier-2/3 cities and rural areas.
